DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group 1, claims 1-10 and 18-20 and Species II in the reply filed on 12/20/04 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 and 18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Buchbinder et al U.S. Pat. No. 4,757,827.

Buchbinder discloses a guiding catheter system comprising: a flexible shaft having a distal end shaped (3, 23, 42 and 64); and a handle assembly (60 and/or 62) movably coupled to the flexible shaft, the flexible shaft selectably movable between a plurality of discrete position of a first degree-of-freedom defined relative to the flexible shaft (col. 4), the flexible shaft restrained in the first degree-of-freedom at each position of the plurality of discrete position (fig. 1), the flexible shaft movable through a predetermined displacement of a second degree-of-freedom defined relative to the flexible shaft at each position of the plurality of discrete positions (col. 4); and wherein motion of the flexible shaft relative to the handle assembly results in a controllable sweeping motion at the distal end the flexible shaft (col. 4); as to claims 2-3, (fig. 6);

Art Unit: 3763

as to claim 5, (66); as to claim 5, (fig. 6); as to claim 6, (66); as to claims 7-8, (fig. 6); as to claims 18-20, (see above rejections).

Allowable Subject Matter

Claims 9 and 10 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
